

## Google Local Business Center

# Google Local Business Center

## Geographically placing your business in Google

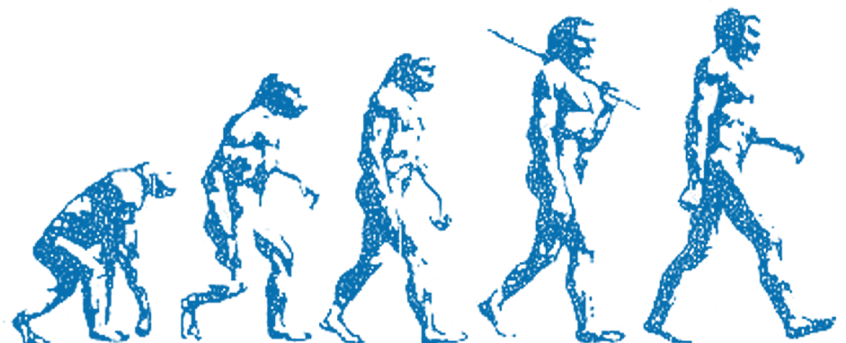

If you have a traditional bricks and mortar business we recommend you use our Google Local service.

Google Local enhances your listing in Google when searching geographically and lists your business in [Google Maps](#) and its related channels.

Google Maps is continually being developed, so it's a good idea to get listed as soon as you can to benefit from the free traffic it sends.

We offer a full Google Local service to get you started.
